

BIOGRAPHICAL SKETCH

Provide the following information for the Senior/key personnel and other significant contributors.
Follow this format for each person. **DO NOT EXCEED FIVE PAGES.**

NAME: Hunt, Morgan Casey

eRA COMMONS USER NAME (credential, e.g., agency login): huntmc

POSITION TITLE: Associate Professor of Psychology

EDUCATION/TRAINING (Begin with baccalaureate or other initial professional education, such as nursing, include postdoctoral training and residency training if applicable. Add/delete rows as necessary.)

INSTITUTION AND LOCATION	DEGREE (if applicable)	Completion Date MM/YYYY	FIELD OF STUDY
University of California, Berkeley	B.S.	05/1990	Psychology
University of Vermont	Ph.D.	05/1996	Experimental Psychology
University of California, Berkeley	Postdoctoral	08/1998	Public Health and Epidemiology

Comment [LWH1]: Be sure to use the correct form. (Download from [here](#).)

NOTE: The formatting for the top of the table has been simplified.

Comment [LWH2]:
5 pages now allowed.

Comment [LWH3]: These instructions (as well as those in the USER NAME and EDUCATION/TRAINING rows and in the DEGREE and Completion Date headers) can be deleted to give the document a cleaner, less cluttered look --- and save space.

Comment [LWH4]: For consistency, this header should be in ALL CAPS

Comment [LWH5]: Include location to identify which of multiple campuses, if applicable.

Comment [LWH6]: These empty rows at the bottom of the table should be deleted.

Comment [LWH7]: NIH instructions for sections A, B, C, and D, (shown in yellow boxes) should NOT be included in the final biosketch.

A. Personal Statement

- > Briefly describe why you are well-suited for your role in the project described in this application.
- > The relevant factors may include aspects of your training; your previous experimental work on this specific topic or related topics; your technical expertise; your collaborators or scientific environment; and your past performance in this or related fields. (You may mention specific contributions to science that are not included in Section C.)
- > Also, you may identify up to four peer reviewed publications that specifically highlight your experience and qualifications for this project.
- > If you wish to explain impediments to your past productivity, you may include a description of factors such as family care responsibilities, illness, disability, and active duty military service.

I have the expertise, leadership, training, expertise and motivation necessary to successfully carry out the proposed research project. I have a broad background in psychology, with specific training and expertise in ethnographic and survey research and secondary data analysis on psychological aspects of drug addiction. My research includes neuropsychological changes associated with addiction. As PI or co-Investigator on several university- and NIH-funded grants, I laid the groundwork for the proposed research by developing effective measures of disability, depression, and other psychosocial factors relevant to the aging substance abuser, and by establishing strong ties with community providers that will make it possible to recruit and track participants over time as documented in the following publications. In addition, I successfully administered the projects (e.g. staffing, research protections, budget), collaborated with other researchers, and produced several peer-reviewed publications from each project. As a result of these previous experiences, I am aware of the importance of frequent communication among project members and of constructing a realistic research plan, timeline, and budget. The current application builds logically on my prior work. During 2005-2006 my career was disrupted due to family obligations. However, upon returning to the field I immediately resumed my research projects and collaborations and successfully competed for NIH support.

2. Hunt, M.C., Jensen, J.L. & Crenshaw, W. (2007). Substance abuse and mental health among community-dwelling elderly. *International Journal of Geriatric Psychiatry*, 24(9), 1124-1135.
3. Hunt, M.C., Wiechelt, S.A. & Merrylye, R. (2008). Predicting the substance-abuse treatment needs of an aging population. *American Journal of Public Health*, 45(2), 236-245. **PMCID: PMC9162292**

Comment [LWH8]:
According to NIH's Biosketch [FAQs](#), #15:

Are the DOI (Digital Object Identifier), PMID (PubMed reference number), and PMCID (PubMed Central reference number) required with each reference in the biosketch?

NIH does not require a DOI (Digital Object Identifier) or PMID (PubMed reference number) with each reference in the biosketch.

However, NIH does require a PMCID for papers that fall under the public access policy. Please see <http://publicaccess.nih.gov/include-pmcid-citations.htm> for more details.

Comment [LWH9]: But....
It simplifies keeping track if you include these identifiers whenever they exist.

4. Hunt, M.C., Newlin, D.B. & Fishbein, D. (2009). Brain imaging in methamphetamine abusers across the life-span. *Gerontology*, 46(3), 122-145.

B. Positions and Honors

- > List in chronological order previous positions, concluding with the present position.
- > List any honors.
- > Include present membership on any Federal Government public advisory committee.

Positions and Employment

1998-2000 Fellow, Division of Intramural Research, National Institute of Drug Abuse, Bethesda, MD
 2000-2002 Lecturer, Department of Psychology, Middlebury College, Middlebury, VT
 2001- Consultant, Coastal Psychological Services, San Francisco, CA
 2002-2005 Assistant Professor, Department of Psychology, Washington University, St. Louis, MO
 2007- Associate Professor, Department of Psychology, Washington University, St. Louis, MO

Comment [LWH10]:

Include:
 > Position title
 > Department or unit
 > Organization name
 > Organization location

Other Experience and Professional Memberships

1995- Member, American Psychological Association
 1998- Member, Gerontological Society of America
 1998- Member, American Geriatrics Society
 2000- Associate Editor, *Psychology and Aging*
 2003- Board of Advisors, Senior Services of Eastern Missouri
 2003-05 NIH Peer Review Committee: *Psychobiology of Aging*, ad hoc reviewer
 2007-11 NIH Risk, Adult Addictions Study Section, members

Comment [LWH11]: Service as a peer reviewer for federal agencies should be included.

Honors

2003 Outstanding Young Faculty Award, Washington University, St. Louis, MO
 2004 Excellence in Teaching, Washington University, St. Louis, MO
 2009 Award for Best in Interdisciplinary Ethnography, International Ethnographic Society

C. Contribution to Science

- > Briefly describe up to five of your most significant contributions to science.
- > For each contribution, indicate the historical background that frames the scientific problem; the central finding(s); the influence of the finding(s) on the progress of science or the application of those finding(s) to health or technology; and your specific role in the described work.
- > For each of these contributions, reference up to four peer-reviewed publications or other non-publication research products (can include audio or video products; patents; data and research materials; databases; educational aids or curricula; instruments or equipment; models; protocols; and software or network) that are relevant to the described contribution.
- > The description of each contribution should be no longer than one half page including figures and citations.
- > Also provide a URL to a full list of your published work as found in a publicly available digital database such as SciENcv or My Bibliography, which are maintained by the US National Library of Medicine.

Comment [LWH12]: Figures can be included (within the 1/2 page allowed for each of the contributions), so take advantage of this if you can.

Not only do figures convey lots of info, they will make this text-dense document easier to read.

Comment [LWH13]: "Science"... as relevant to this project and application.

1. My early publications directly addressed the fact that substance abuse is often overlooked in older adults. However, because many older adults were raised during an era of increased drug and alcohol use, there are reasons to believe that this will become an increasing issue as the population ages. These publications found that older adults appear in a variety of primary care settings or seek mental health providers to deal with emerging addiction problems. These publications document this emerging problem but guide primary care providers and geriatric mental health providers to recognize symptoms, assess the nature of the problem and apply the necessary interventions. By providing evidence and simple clinical approaches, this body of work has changed the standards of care for addicted older adults and will continue to provide assistance in relevant medical settings well into the future. I served as the primary investigator or co-investigator in all of these studies.
 - a. Gryczynski, J., Shaft, B.M., Merry, R., & Hunt, M.C. (2002). Community based participatory research with late-life addicts. *American Journal of Alcohol and Drug Abuse*, 15(3), 222-238.

Comment [LWH14]: According to NIH's Biosketch FAQs, #12:

Does the PD/PI need to be an author on a publication used to reference a contribution to science?

No, the publication does not need to be their own. It is up to the applicant to describe their contributions. Listing a key publication that builds on their work is one way of doing so.

- b. Shaft, B.M., Hunt, M.C., Merryly, R., & Venturi, R. (2003). Policy implications of genetic transmission of alcohol and drug abuse in female nonusers. *International Journal of Drug Policy*, 30(5), 46-58.
 - c. Hunt, M.C., Marks, A.E., Shaft, B.M., Merryly, R., & Jensen, J.L. (2004). Early-life family and community characteristics and late-life substance abuse. *Journal of Applied Gerontology*, 28(2), 26-37.
 - d. Hunt, M.C., Marks, A.E., Venturi, R., Crenshaw, W. & Ratonian, A. (2007). Community-based intervention strategies for reducing alcohol and drug abuse in the elderly. *Addiction*, 104(9), 1436-1606. PMID: PMC9000292
2. In addition to the contributions described above, with a team of collaborators, I directly documented the effectiveness of various intervention models for older substance abusers and demonstrated the importance of social support networks. These studies emphasized contextual factors in the etiology and maintenance of addictive disorders and the disruptive potential of networks in substance abuse treatment. This body of work also discusses the prevalence of alcohol, amphetamine, and opioid abuse in older adults and how networking approaches can be used to mitigate the effects of these disorders.
- a. Hunt, M.C., Merryly, R. & Jensen, J.L. (2005). The effect of social support networks on morbidity among elderly substance abusers. *Journal of the American Geriatrics Society*, 57(4), 15-23.
 - b. Hunt, M.C., Pour, B., Marks, A.E., Merryly, R. & Jensen, J.L. (2005). Aging out of methadone treatment. *American Journal of Alcohol and Drug Abuse*, 15(6), 134-149.
 - c. Merryly, R. & Hunt, M.C. (2007). Randomized clinical trial of cotinine in older nicotine addicts. *Age and Ageing*, 38(2), 9-23. PMID: PMC9002364
3. Methadone maintenance has been used to treat narcotics addicts for many years but I led research that has shown that over the long-term, those in methadone treatment view themselves negatively and they gradually begin to view treatment as an intrusion into normal life. Elderly narcotics users were shown in carefully constructed ethnographic studies to be especially responsive to tailored social support networks that allow them to eventually reduce their maintenance doses and move into other forms of therapy. These studies also demonstrate the policy and commercial implications associated with these findings.
- a. Hunt, M.C. & Jensen, J.L. (2003). Morbidity among elderly substance abusers. *Journal of the Geriatrics*, 60(4), 45-61.
 - b. Hunt, M.C. & Pour, B. (2004). Methadone treatment and personal assessment. *Journal Drug Abuse*, 45(5), 15-26.
 - c. Merryly, R. & Hunt, M.C. (2005). The use of various nicotine delivery systems by older nicotine addicts. *Journal of Ageing*, 54(1), 24-41. PMID: PMC9112304
 - d. Hunt, M.C., Jensen, J.L. & Merryly, R. (2008). The aging addict: ethnographic profiles of the elderly drug user. NY, NY: W. W. Norton & Company.

Comment [LWH15]: According to NIH's Biosketch [FAQs](#), #6, applicants may use 'et al.' in lieu of listing all authors in a citation.

Comment [LWH16]: This biosketch is well within the 5-page limit, so adding a space between the description and the citations in all 4 cases would make it easier for reviewers to read.

Comment [LWH17]: According to NIH's Biosketch [FAQs](#), #5, this URL is allowed but not required. *But why leave it out???*

Comment [LWH18]: According to NIH's Biosketch [FAQs](#), #10. The NIH prefers applicants use [MyBibliography](#).

NIH cautions reviewers against accessing URLs that may compromise their anonymity.

Other publicly available sites which include data from a broad spectrum of institutions and maintain anonymity of the users accessing the sites are acceptable (e.g., Google Scholar).

Links to sites managed by the investigator or applicant organization or URLs including the applicant organization name should not be used.

Complete List of Published Work in MyBibliography:

<http://www.ncbi.nlm.nih.gov/sites/myncbi/collections/public/1PgT7IEFIAJBtGMRdWFmJWAO/?sort=date&direction=ascending>

Comment [LWH19]: This is the ONLY URL allowed in the biosketch. It should start with "http://" and be written out completely.

According to NIH's Biosketch [FAQs](#), #4, this should NOT be a live link in the document.

D. Research Support

- > List both selected ongoing and completed research projects for the past three years (Federal or non-Federally-supported).
- > *Begin with the projects that are most relevant to the research proposed in the application.*
- > Briefly indicate the overall goals of the projects and responsibilities of the key person identified on the Biographical Sketch.
- > Do not include number of person months or direct costs.

Comment [LWH20]: SELECTED research projects, i.e., those relevant to this application – science content or to demonstrate applicant's significant role (esp. as PI) AND only projects in the past 3 years.

Ongoing Research Support

R01 DA942367 Hunt (PI) 09/01/08-08/31/16

Health trajectories and behavioral interventions among older substance abusers

The goal of this study is to compare the effects of two substance abuse interventions on health outcomes in an urban population of older opiate addicts.

Role: PI

Comment [LWH21]: This is the NIH award number, so it has been used instead of a description of the type of grant and sponsor. (Compare with 3rd project below.)

R01 MH922731 Merryle (PI) 12/15/07-11/30/15

Physical disability, depression and substance abuse in the elderly

The goal of this study is to identify disability and depression trajectories and demographic factors associated with substance abuse in an independently-living elderly population.

Role: Co-Investigator

Faculty Resources Grant, Washington University

08/15/09-08/14/15

Opiate Addiction Database

The goal of this project is to create an integrated database of demographic, social and biomedical information for homeless opiate abusers in two urban Missouri locations, using a number of state and local data sources.

Role: PI

Comment [lwh22]: For consistency, only the first word in this title should be capitalized.

Completed Research Support

R21 AA998075 Hunt (PI) 01/01/11-12/31/13

Community-based intervention for alcohol abuse

The goal of this project was to assess a community-based strategy for reducing alcohol abuse among older individuals.

Role: PI
